Customer Problem Statements – EV Market Analysis

The customer problem statements identify the challenges faced by **Emily Johnson, an EV Market Strategy Director**, while analyzing the electric vehicle market. They focus on her goals, difficulties and emotions related to understanding market trends, comparing manufacturers, evaluating vehicle categories, and analyzing battery technologies and customer satisfaction.

These problem statements help define the **key requirements of the EV Market Performance Dashboard** and ensure that the visualizations provide meaningful insights for strategic decision-making.

Problem Statement	I am a customer	I am trying to	but	because	which makes me feel
PS1 Understand overall EV market performance and identify key manufacturers and high-performing vehicle categories.	• An EV Market Strategy Director	• Identify market trends, leading manufacturers and high-performing vehicle categories.	• The large amount of EV market data makes it difficult to identify important trends quickly.	• There are many manufacturers, vehicle categories, sales figures and performance metrics to analyse.	• Overwhelmed and concerned about missing important market opportunities.
PS2 Compare battery technologies, driving range and customer satisfaction to plan product strategies.	• An EV Market Strategy Director	• Compare battery technologies, driving range and customer satisfaction to plan product strategies.	• It is difficult to compare these factors and understand which segments have the greatest potential.	• The information is spread across many different attributes and requires detailed analysis.	• Uncertain about making the right product and investment decisions.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	**An EV Market Strategy Director**	identify market trends, leading manufacturers, and high-performing vehicle categories	the large amount of EV market data makes it difficult to identify important trends quickly	the information contains many manufacturers, vehicle categories, sales figures, and performance metrics	overwhelmed and concerned about missing important market opportunities
PS-2	**An EV Market Strategy Director**	compare battery technologies, driving range, and customer satisfaction to plan product strategies	it is difficult to compare these factors and understand which segments have the greatest potential	the relevant information is spread across many different attributes and requires detailed analysis	uncertain about making the right product and investment decisions
